

GitHub Copilot Integration

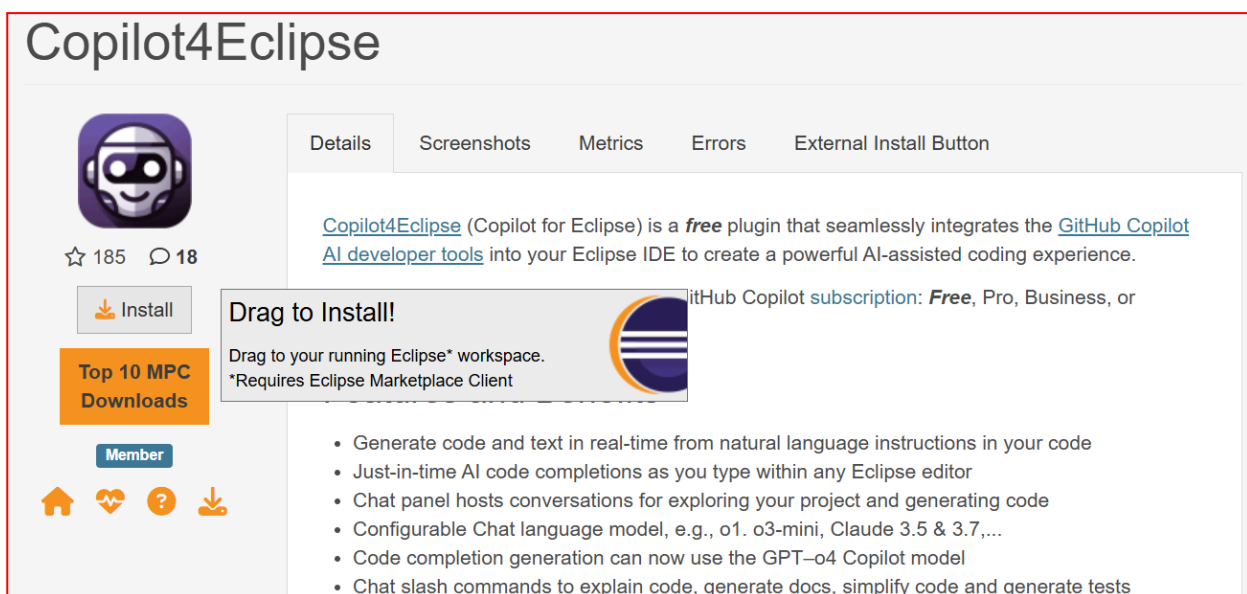

Step 1:

Go to the browser and search for Eclipse Copilot

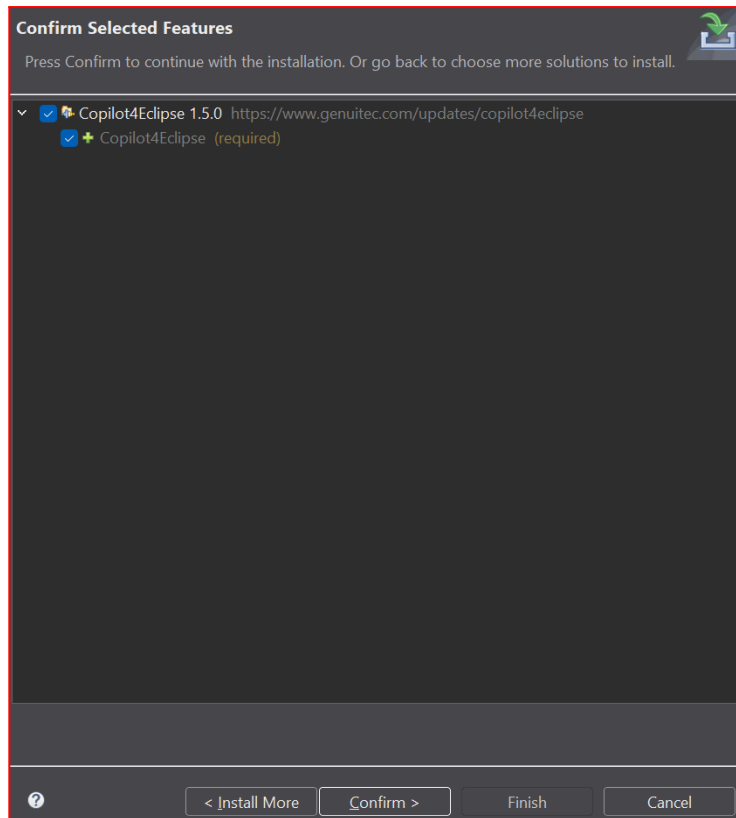

Link: <https://marketplace.eclipse.org/content/copilot4eclipse>

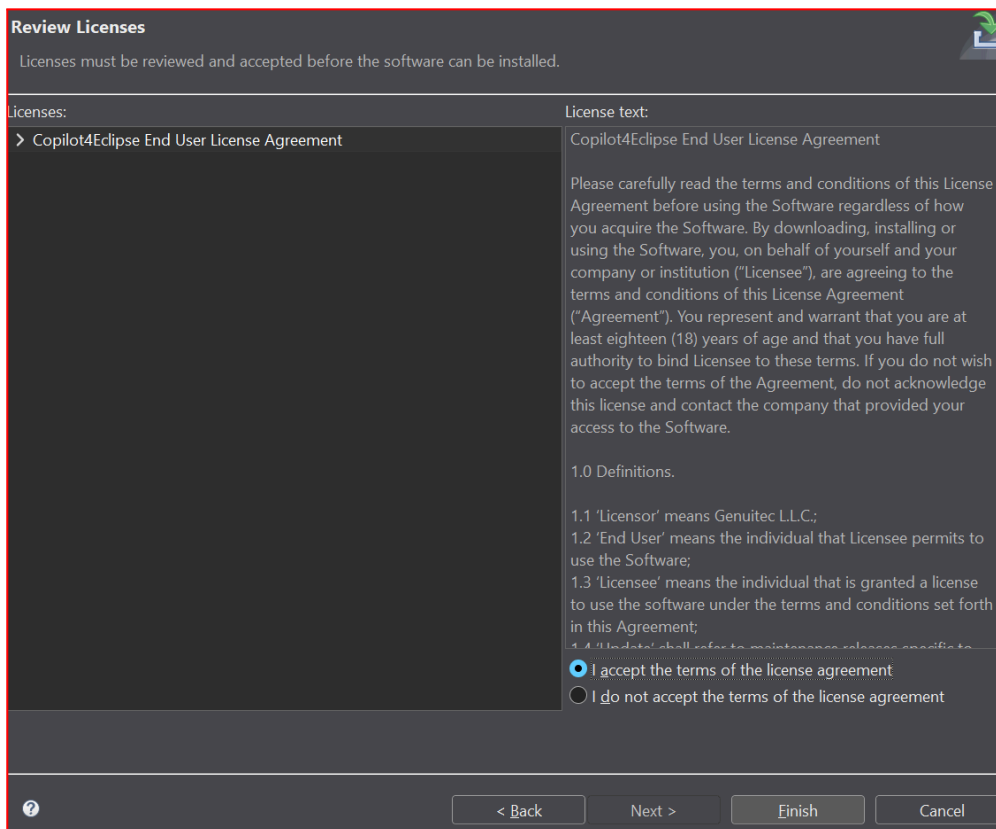

Step 2: Hover over the "Install" button and then drag it into the Eclipse IDE.

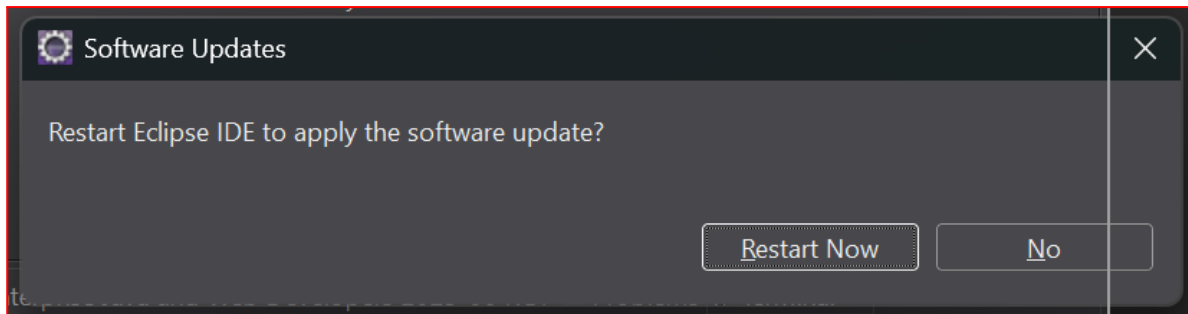

Step 3: When the installation starts, verify the features and options displayed in the screenshot below.

Step 4: Completing the installation, you must accept the License Agreement and click Finish.

Step 5: After accepting the license, a pop-up will prompt you to restart the application. Once restarted, another pop-up will appear where you need to select all options and continue.

Step 6: Please sign in using your GitHub account via the plugin icon below. Once you complete the sign-in process, you will be able to use the features of GitHub Copilot.
